

### **robotic welding intelligence and pdf**

A robot is a machine—especially one programmable by a computer—capable of carrying out a complex series of actions automatically. Robots can be guided by an external control device or the control may be embedded within. Robots may be constructed to take on human form but most robots are machines designed to perform a task with no regard to how they look.

### **Robot - Wikipedia**

Robotics is an interdisciplinary branch of engineering and science that includes mechanical engineering, electronic engineering, information engineering, computer science, and others. Robotics deals with the design, construction, operation, and use of robots, as well as computer systems for their control, sensory feedback, and information processing. ...

### **Robotics - Wikipedia**

Bulk additive manufacturing cell. Robotic cell capable of building high-integrity parts from the ground up, and adding metal features to large forgings such as pressure vessels.
