Health and Safety Executive Pressure systems: A brief guide to safety Page 2 of 5 The main hazards are: impact from the blast of an explosion or release of compressed liquid or gas; impact from parts of equipment that fail or any flying debris; contact with released liquid or gas, such as steam; and fire resulting from the escape of flammable liquids or gases.

Pressure systems at work: A brief guide to safety INDG261

Federal Motor Vehicle Safety Standards (FMVSS) are U.S. federal regulations specifying design, construction, performance, and durability requirements for motor vehicles and regulated Automobile safety-related components, systems, and design features. They are the U.S. counterpart to the UN Regulations developed by the World Forum for Harmonization of Vehicle Regulations and recognized to ...

A high-integrity pressure protection system (HIPPS) is a type of safety instrumented system (SIS) designed to prevent over-pressurization of a plant, such as a chemical plant or oil refinery. The HIPPS will shut off the source of the high pressure before the design pressure of the system is exceeded, thus preventing loss of containment through rupture of a line or vessel.

High-integrity pressure protection system - Wikipedia
