The Engineering Laboratory promotes U.S. innovation and industrial competitiveness by advancing measurement science, standards, and technology for engineered systems in ways that enhance economic security and improve quality of life.

Engineering Laboratory | NIST

Organizational resilience is defined as "the ability of a system to withstand changes in its environment and still function". It is a capability that involves organizations either being able to endure the environmental changes without having to permanently adapt, or the organization is forced to adapt a new way of working that better suits the new environmental conditions.

Resilience (organizational) - Wikipedia

Best Practices for Software Development Teams

In our Engineering Intern Program, you can be part of a team that shapes the future of aerospace. Our engineering interns help turn dreams into reality, bring world-class innovation to market and help design our next generation of amazing products.

Boeing: College and Early Career: Engineering Intern Programs

In the context of software engineering, software quality refers to two related but distinct notions that exist wherever quality is defined in a business context: . Software functional quality reflects how well it complies with or conforms to a given design, based on functional requirements or specifications. That attribute can also be described as the fitness for purpose of a piece of software ...

Started in 1992 by the Dark Tangent, DEFCON is the world's longest running and largest underground hacking conference. Hackers, corporate IT professionals, and three letter government agencies all converge on Las Vegas every summer to absorb cutting edge hacking research from the most brilliant minds in the world and test their skills in contests of hacking might.

The new process, called gel electrospinning, is described in a paper by MIT professor of chemical engineering Gregory Rutledge and postdoc Jay Park. The paper appears online and will be published ...

Technique could produce strong, resilient nanofibers for

Computer use is an integral part of the Civil Engineering curriculum. From required courses in computer programming and numerical analysis to subsequent use and development of Civil Engineering programs, students experience the use of computers as a planning, analysis, design, and managerial tools.
