An international science fleet of robotic spacecraft are exploring the various worlds of our solar system.

### **Overview | Planets – Solar System Exploration: NASA Science**

The Solar System is the gravitationally bound system of the Sun and the objects that orbit it, either directly or indirectly. Of the objects that orbit the Sun directly, the largest are the eight planets, with the remainder being smaller objects, such as the five dwarf planets and small Solar System bodies. Of the objects that orbit the Sun indirectly—the moons—two are larger than the ...
